Centurion Sterilization Services has offered uncompromised service and quality since 1975. Our goal is to guide our customers through every step of the sterilization process to ensure hassle-free, prompt, accurate results. We will work closely with you to provide customized protocols, regulatory support, testing and full documentation.

Our highly experienced staff includes teams from the laboratory, research and development, and quality control. We are always available to assist you, from the planning stages to your completed validation.

Whatever your needs, Centurion will guide you through – every step of the way.
